Professional Summary

Self-motivated full-stack and backend engineer with 2+ years of internship experience delivering high-performance services at scale. Proven track record in **TypeScript** and **C#** development, leading remote, distributed teams, and building end-to-end automation pipelines. Strong AWS foundation (EC2, VPC, Docker, Kubernetes, Terraform) with a focus on reliability (99.99% uptime) and latency reduction (30%). Passionate about responsible AI and independent task ownership.

Technical Skills

Languages	Cloud & DevOps	Frameworks / Tools	Databases
TypeScript • C# • Go • Kotlin • Python • Java • JavaScript • SQL	AWS (general) • Git • Docker • Kubernetes • Terraform • CI/CD pipelines • Prometheus • Grafana	React • Next.js • Electron • Spring Boot • Node.js • Express • GraphQL • Zustand	MongoDB • PostgreSQL • MySQL

AWS Services – EC2, VPC, RDS, Auto-Scaling, S3 (knowledge), Lambda (knowledge), API Gateway (knowledge), Step Functions (knowledge)

Additional – Code reviews • Unit testing (15+ tests) • Automation pipelines • Remote collaboration tools (Slack, GitHub PRs)

Experience

Lead Full-Stack Software Engineer Intern – City College of San Francisco (CCSF)
May 2023 – Aug 2023
- Designed and shipped an Electron-React desktop app for tutor scheduling; built a Node.js/

Express API with MongoDB, handling **10 k+ daily requests**.

- Deployed the stack on **AWS EC2** within a secure VPC, scripted the provisioning using **Terraform** and implemented **Git-based CI/CD** pipelines.
- Conducted **code reviews** and wrote **unit tests** covering 85% of critical paths, enabling independent task ownership.

Site Reliability Engineer Intern – Meta (Remote)

Sep 2023 – Dec 2023

- Containerized a Flask microservice with Docker, set up **Kubernetes** orchestration and **auto-scaling** on AWS EC2 with Redis caching, cutting latency by **30%** and reducing bugs by **30%**.
- Implemented monitoring with **Prometheus/Grafana**, and authored automation scripts for log aggregation and alerting.
- Collaborated nightly with a distributed team across three continents via Slack and GitHub, syncing across time zones.

Lead Open-Source Software Engineer Intern – CodeDay Labs (Remote)

Jan 2024 – Mar 2024

- Contributed to Dagster UI using **React/TypeScript/GraphQL**, delivering a **50% UX improvement** to navigation components.
- Added a keybinding feature to the Eclipse IDE plugin, writing **15+ unit tests** and conducting thorough code reviews.
- Coordinated with contributors worldwide, managing PRs, issue triage, and release notes in an entirely remote setting.

Backend Developer Intern – A Bank (Hybrid)

Apr 2024 – Jun 2024

- Built **7+ Java Spring Boot microservices** on AWS (EC2, RDS) and deployed via Docker, Kubernetes, and **Terraform**; achieved **99.99% uptime**.
- Refactored the front-end to Angular/ReactNative, reducing page load latency by **2s**.
- Introduced **automation pipelines** for database migrations and performed regular **code reviews** to maintain quality.

Academic C# Project – City College of San Francisco

Fall 2024

- Developed a RESTful API for a campus event scheduler using **C#**, **ASP.NET Core**, and **Entity Framework**, persisting data to **SQL Server**.
- Implemented **unit tests** (xUnit) covering 90% of endpoints and integrated the service into a CI pipeline that auto-deploys to a staging EC2 instance.

Projects

TikTok AI Hackathon – Winner

Tech Stack: Next.js, AuthJS, GCP, **TypeScript**, PostgreSQL, ShadCN UI

- Built an AI-powered content recommendation engine while adhering to responsible AI guidelines (bias mitigation, transparency).

Enterprise Travel Assistant AI Agent

Tech Stack: MongoDB Atlas, FastAPI, Next.js (**TS**), LangChain, Fireworks AI, Voyage AI

- Designed a conversational travel planner that respects user privacy and includes ethical AI safeguards (data minimization, explainability).

Education

B.S. Computer Science – City College of San Francisco (expected May 2027)

- GPA 4.0, Dean's List (2×)
 - Microsoft Last Mile Education Fund Scholar
 - Relevant Coursework: Data Structures & Algorithms, Operating Systems, Cloud Computing
-
