Professional Summary

Full-stack and backend engineer with 2+ years of internship experience delivering scalable web and desktop solutions. Expert in Go, Kotlin, Python, Java, and JavaScript/TypeScript, with hands-on proficiency in AWS, GCP, Docker, and Kubernetes. Proven track record of leading projects, designing high-performance APIs, containerizing services, and automating CI/CD pipelines to boost reliability and cut latency by up to 30 %.

Education

B.S. Computer Science – City College of San Francisco (expected May 2027)

- GPA 4.0; Dean's List (2 ×)
 - Microsoft Last Mile Education Fund Scholar
 - Relevant Coursework: Data Structures & Algorithms
-

Experience

Lead Full-Stack Software Engineer Intern – City College of San Francisco

- Designed and delivered an Electron-React desktop app and a Node.js/MongoDB API for tutor scheduling; deployed on AWS EC2 with VPC security.
- Implemented role-based authentication and real-time syncing, reducing manual scheduling effort by 40 %.
- Established CI/CD pipelines with GitLab, decreasing release cycle time from 2 weeks to 3 days.

Site Reliability Engineer Intern – Meta

- Containerized a Flask microservice with Docker and orchestrated auto-scaling on AWS EC2; integrated Redis caching.
- Built end-to-end CI/CD workflow and Prometheus/Grafana monitoring, cutting latency by 30 % and bugs by 30 %.

- Authored runbooks and incident response scripts, improving mean-time-to-recovery (MTTR) by 25%.

Lead Open-Source Software Engineer Intern – CodeDay Labs

- Contributed to Dagster UI using React/TypeScript/GraphQL; enhanced navigation UX by 50 % through redesign.
- Developed a keybinding plugin for Eclipse IDE, adding 15+ automated tests to ensure stability.
- Coordinated with a distributed team of 8 contributors, merging 12 pull requests per sprint.

Backend Developer Intern – A Bank

- Built 7+ Java Spring Boot microservices; deployed with Docker, Kubernetes, and Terraform on AWS (EC2, RDS).
- Achieved 99.99% service uptime and reduced API response time by 2 seconds after front-end migration to Angular/React Native.
- Implemented secure API gateways and rate-limiting, supporting a 150% traffic increase during peak periods.

Projects

- **TikTok AI Hackathon Winner** – Developed a Next.js platform with AuthJS, TypeScript, PostgreSQL, and ShadCN UI; integrated AI-driven content recommendation, earning first place.
- **Enterprise Travel Assistant AI Agent** – Built an AI-powered travel assistant using FastAPI, Next.js (TS), LangChain, MongoDB Atlas, and Fireworks/Voyage AI; delivered real-time itinerary generation and cost optimization.

Technical Skills

- **Languages:** Go, Kotlin, Python, C#, Java, JavaScript, TypeScript, SQL (PostgreSQL, MySQL)
- **Frameworks & Libraries:** React, Next.js, Angular, Electron, Node.js, Express, Spring Boot, Zustand, GraphQL
- **Cloud & DevOps:** AWS (EC2, RDS, VPC), Google Cloud Platform, Docker, Kubernetes, Terraform, Git, GitLab CI/CD, Prometheus, Grafana

- **Databases:** MongoDB, PostgreSQL, MySQL
- **Other:** HTML5, CSS, CI/CD pipeline design, Postman, GNU/Linux
